Professional Summary

B.Tech Computer Science and Engineering student at CUSAT with strong skills in data structures and algorithms, C++, and Java. Passionate about building efficient software, solving complex problems, and working on autonomous systems.

Education

Cochin University of Science and Technology — Kochi, India
B.Tech, Computer Science and Engineering — 2025 — 2029
CGPA: 9.77

Holy Family Higher Secondary School — Kozhikode, India
Higher Secondary Education — 2022 — 2024
Score: 99.5%

Relevant Coursework

Data Structures and Algorithms , Object-Oriented Programming (C++) , Computer Programming , Computer Architecture and Organization , Discrete Computational Structures; Principles of Programming Languages; Automata Languages and Computations , Introduction to Cyber Physical Systems , Introduction to Robotics , Linear Algebra and Transform Techniques , Calculus.

Skills

Languages: C++, C, Java
OS: Linux, Windows
Tools & Platforms: ROS, Gazebo, Git, GitHub, MATLAB, VS Code, LaTeX, MS Word
Soft Skills: Leadership, Team Building, Adaptability, Public Speaking, Analytical Thinking, Fast Learner, Technical Report Writing
Linguistic Proficiency: English (Professional), Malayalam (Native), Hindi (Elementary), Tamil (Elementary)

Professional Experience

MathWorks — Kochi, India
Summer Intern — Jun 2026

- Completed hands-on training in MATLAB and Simulink, covering computational problem-solving, data analysis, signal processing, and simulation-based system modelling, and applied it through three projects:
- **Stellar Motion:** Analysed the Hydrogen-alpha wavelength to find the star's redshift factor and determined whether it was moving away from or towards Earth.
- **Natick Elevation:** Built a 3D surface plot of the terrain around the MathWorks Headquarters in Natick from latitude, longitude, and elevation data using MATLAB functions such as `griddata` and `surf`.
- **Thermostat Model:** Designed and simulated a virtual thermostat control system in Simulink that maintains a constant temperature of 22°C.

Projects

MarkIt — Smart Academic Performance Dashboard — 2025
Software Project, CUSAT

- Built an intelligent dashboard to track academic performance, automate CGPA and average calculations, and generate predictive insights on the scores needed to achieve target grades.

BHADRA — Universal Accident Detection and Emergency Response System — 2025
CUSAT

- Designed a multi-sensor vehicle accident detection system integrating accelerometers, gyroscopes, vehicle diagnostics, GPS, and GSM communication to automate emergency alerts with precise location data.
- Designed a system concept for cross-vehicle compatibility, including two-wheelers, cars, and commercial vehicles.

Rakshak — Autonomous Flood Rescue and Victim Detection System — 2025
CUSAT

- Designed an autonomous disaster-response system combining thermal, sound, and motion sensors with GPS and LoRa mesh networking to locate stranded victims during network outages.
- Outlined a concept incorporating solar and kinetic energy harvesting, location stabilization, and real-time alerts to support rescue operations.

Leadership Experience

AROHA Drone Club Kochi, India
Software Team Lead (previously Software and Documentation Member) Oct 2025 — Present

- Contributed to the software team of an autonomous drone project, carrying out simulations in Gazebo and supporting technical documentation. Part of the team that achieved World Rank 15 and Kerala Rank 1 at ISDC 2026, and AIR 9 and Kerala Rank 1 at SAE Aerothon 2025.

Bharat Scouts and Guides 2022 – 2024
Active Member (Dwitiya Sopan, Nanmamudra) Kozhikode, India

- Conducted social awareness campaigns on road safety and an anti-drug awareness class for students, promoting responsible and healthy behaviour in the community.
- Participated in cleanliness drives in my hometown and school, and volunteered at school events and celebrations.
- Distributed food and essential supplies to people in need, building empathy, teamwork and a lasting commitment to service.

Invited Talks

- "AEROVERSE," hosted by IEEE AESS CUSAT SB and IEEE IAS CUSAT SBC, 2026.

Certifications

Programming in MATLAB Certification
MATLAB — 2026

MATLAB Onramp Certification
MATLAB — 2026

Simulink Onramp Certification
SIMULINK — 2026

Machine Learning Onramp Certification
MATLAB — 2026

Computer Vision 101
Infosys Springboard — 2026

Deep Learning for Developers
Infosys Springboard — 2026

Artificial Intelligence Primer Certification
Infosys Springboard — 2026

Principles of Generative AI Certification
Infosys Springboard — 2026

Agile Scrum in Practice
Infosys Springboard — 2026

Introduction to Data Science
Infosys Springboard — 2026

Awards and Achievements

- 1st Place — IEEE CAS SBC Ideathon, CUSAT.
- 1st Place — Ignite Ideas, ACES Knowledge Festival 2026 (VIBHAVA).
- 2nd Place — SOCE–EOC Ideathon, CUSAT.
- ISDC 2026 — World Rank 15, Kerala Rank 1 in the International Space Drone Challenge.
- AeroTHON 2025 — AIR 9, Kerala Rank 1 in SAE India's national UAV competition.
- Dwitiya Sopan — Bharat Scouts and Guides.
- Nanmamudra Certificate — Bharat Scouts and Guides.
